

accu-jet[®] pro

Pipette Controller

Powerful: Fills a 50 ml pipette in less than 10 seconds.

Sensitive: Precise selection of pipetting speed.

Long-lasting: up to 8 hours of continuous pipetting without recharging

accu-jet® pro

Small but smart – the accu-jet® pro lives up to its promises:

- Fatigue-free pipetting in prolonged operations:
 - ergonomic handgrip
 - weight only 190 g
 - perfectly balanced design
- Motor and pump operate with quite discretion.
- For working quickly, a 50 ml pipette is filled in less than 10 seconds at maximum motor speed!
- Use the sensitive pipetting buttons for continuously variable pipetting speed

Relax – everything is under control!

Pipetting has never been so comfortable

Dispensing liquid

Choose between gravity delivery (for pipettes calibrated "to deliver") or blow-out delivery with motor power.

Recharging-indicator

The flashing recharging-indicator LED alerts you that the battery is running low. Don't worry – you can work for another two hours before it's empty – you can use the instrument while it's charging.

Motor speed

Select the desired maximum pipetting speed by turning the thumbwheel. A slower speed setting provides sensitive, controlled operation with lower volume pipettes.

Battery compartment cover

The accu-jet® pro is supplied with two battery compartment covers. The second cover enables you to place the instrument inverted on the bench, to avoid contamination of the pipette adapter.

Direct outlet of liquid vapors protects against corrosion to ensure long instrument life

Pipette adapter firmly holds pipettes from 0.1 to 200 ml and provides double protection against over-aspiration

Membrane filter

A 0.2 µm hydrophobic membrane filter and a built-in check valve protect against liquid penetrating inside.

Pipette adapter

An replaceable adapter provides perfect fit for glass and plastic pipettes from 0.1 to 200 ml.

Vapor outlet

Any liquid vapors are being diverted away from the user through the outlet in front. Inside parts are protected against corrosion.

■ Single-handed operation

All with one hand: select the delivery mode (gravity-delivery/blow-out) and adjust the motor speed range with your thumb; use variable button pressure for finest control of filling and delivery speed.

■ Advanced charging

The intelligent battery charger prevents overcharging of the NiMH battery. It effectively reduces the lazy-battery-effect (shortened operating time due to premature recharging). Charging time is 4 hours. After that, the charger automatically switches to a pulsed, long-term charging mode.

■ Tidy storage

Keep your accu-jet® pro within reach by placing it inverted on your lab bench. Or store it in the wall support, saving space.

■ Four colors

Select from four colors to individualize your accu-jet® pro.

Items supplied

- Pipette controller
- Nickel-metal hydride battery
- 2 battery compartment covers
- Wall support
- AC adapter
- 2 spare membrane filters 0.2 µm
- Operating manual

Specifications

- Weight: 190 g
- Operating and charging temperature:
+10 °C to +35 °C (50 °F to 95 °F)
- Pipetting speed:
50 ml in less than 10 seconds
- For glass and plastic pipettes
from 0.1 to 200 ml
- Approx. eight hours of continuous pipetting
(with a 10 ml pipette) without recharging
- Battery pack:
NiMH battery 2.4 V / 730 mAh
